

## Salute

### *Addition and Subtraction Fact Practice*

**Materials:** Deck of playing cards with the face cards removed

**Directions:**

- This game works best with 3 players but can be played with 2.
- Place the deck of cards in the middle of the 3 players.
- Player One draws a card and without looking places it on their forehead facing out.
- Player Two draws a card and without looking places it on their forehead facing out.
- Player Three silently adds the 2 cards and says the sum out loud.
- Then Player One and Player Two try to be the first to determine the number of the card on their forehead.
- After several turns, switch roles so everyone gets a chance to determine the sum.
