**At the time of lottery (60 days or 14 days out from season starting), LHS only the lowest number of assignments of the traditional schools. LHS's 2 assignments plus the allotment of 3 for TCA lottery slots equals a total of 5 TCA lottery slots available. Since there were only 3 lottery slots taken up by returning students at time of lottery, and only 2 new lottery requests, BOTH students are assigned TCA slots.**

At the time of lottery (60 days or 14 days out from season starting), LHS only the lowest number of assignments of the traditional schools. LHS's 2 assignments plus the allotment of 3 for TCA lottery slots equals a total of 5 TCA lottery slots available. Since there were already 4 lottery slots taken up by returning students at time of lottery, and 2 new lottery requests, a random drawing is done to assign one of the students TCA slots. The other student would be assigned to their neighborhood school (if they live in D20) or offered a spot at the school that is next in the rotation to one of the traditional schools (if they live out of district).
