Materials: Regular deck of playing cards (remove the Kings, and use the Jacks as 11 and the Queens as 12) Two different colored pencils, highlighters, markers or crayons

## Directions:

- Play with two players.
- The object of the game is to "capture" or shade in the most squares.
- On each turn a player draws two cards and multiplies the numbers together to find the product.
- The player then draws a line on one side of that product.
- The goal is to "capture" the product by boxing it in. The player who completes the square shades it in.
- If there are no places to play on the board, the player loses a turn.
- Play continues until all boxes have been shaded in.
- The player with the most "captured" squares is the winner.
